OVERVIEW OF ERP SOFTWARE SOLUTIONS

In today's highly competitive marketplace, implementing software to streamline operational processes can mark the difference between a business struggling to stay afloat and one that's flourishing. Enterprise Resource Planning ERP software exists as one of the most comprehensive solutions for companies in need of back-end organization, with features tailored to businesses of all sizes and industries.

Understanding the Different ERP Modules

ERP solutions offer a variety of modules better to serve the unique needs of companies in diverse industries. Implementing a single cohesive ERP system will provide copious benefits for a company needing more robust back-end management despite the cost and time required.

PRE-IMPLEMENTATION APPROACH

We strongly believe that the Pre-implementation stage is an essential step for successfully implementing large-scale projects. To kick off a seamless implementation, we apply the following methodology for our clients who have selected ERP software or will make their selection.

Start

- Identify Company Size.
- Complexity.
- Budget.
- Success factors.
- Potential risks/gaps.
- Evaluate/identify Workflows.
- Identify S.M.A.R.T goals.

Define

- Organizational structure.
- Objectives/Goals.
- Gaps that need to be addressed.
- Describe processes and ERP requirements.
- Analyze IT landscape.
- Manage "People" Opportunities and Risk.
- Define business needs.

Data Governance

- Determine the master data and ensure its accuracy.
- Data needs to be captured and classified properly.
- Determine organization process forms and document lifecycle.

Determine KPIs & Reporting

- Required standard and customized reports.
- Define fields for analytic reports.

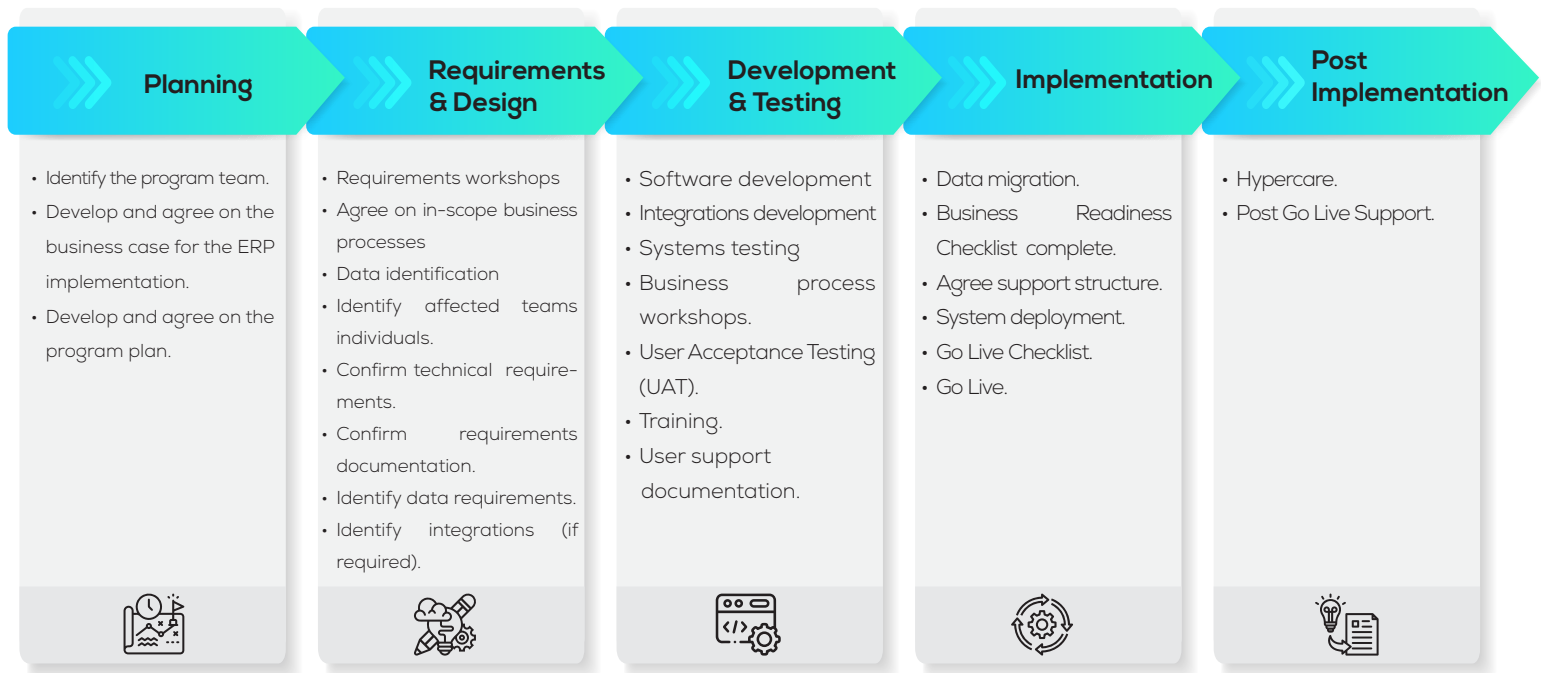

Organizational Change Management

- Adaptive changes.
- Clarification Sessions.
- ERP POC.
- managing the effect of new business processes.
- successfully transition.
- alters components of the organization, such as its culture.

IMPLEMENTATION POST APPROACH

We Strongly believe that Before deciding to move forward with an Enterprise Resource Planning (ERP) software implementation, is to understand what the key steps are and how to approach such a program. The image below shows hemfa's typical steps and a high-level plan for an ERP program. The implementation plan and timelines will vary for every customer. These variations can be based on the scope of the program, the size of the organization, business-specific deadlines – such as financial year-end, and even how well they have responded to change in the past.
